

# 5 Ways to Protect Yourself from Cyber Fraud

Here's what you can do to keep your Fidelity workplace savings account safe.

## Set up online access for your Fidelity NetBenefits® account with a unique username and password.

Cybercriminals frequently attack unregistered online accounts.

- If you're new to NetBenefits®, create a UNIQUE username and password by selecting **Register as a new** user from NetBenefits.com.
- If you're already registered, change your username and password by visiting **NetBenefits.com > Profile > Security Center**.

## Sign up for 2-factor authentication at login to further protect your Fidelity NetBenefits® account.

2-factor authentication at login allows you to enable a challenge every time you log in OR whenever you log in from a new device.

- Visit **NetBenefits.com > Profile > Security Center** to sign up.
- You must have a phone number on file in NetBenefits® to be eligible for this service.

## Add or update your mobile phone number and email address.

Get real-time alerts and confirm sensitive transactions through two-factor authentication.

- Visit **NetBenefits.com > Profile > Personal & Contact Information**.

## Sign up for eDelivery and monitor your Fidelity NetBenefits account.

Check account statements and other documents for unauthorized activity.

- Visit NetBenefits.com regularly. To receive your documents via email instead of U.S. mail, go to **Profile > Communication**.

## Enable Fidelity MyVoice®.

Eliminate the need for passwords with your personal encrypted voiceprint.

- The next time you call, a Fidelity representative will offer to enroll you—you'll need to provide Fidelity consent to create your unique voiceprint.
